The circumstances affecting **engagement in HIV** care can be complex, ranging from stigma, mental health and financial pressures to caring responsibilities, treatment burden and previous healthcare experiences. Successfully supporting people back into care therefore requires us to **look beyond the missed appointment.**

The sessions will highlight best practice approaches, local initiatives, and the role of multidisciplinary care teams in **helping people reconnect with HIV services and achieve long-term outcomes**.

Why attend?

In this webinar, we will:

- Explore why engagement can change over time.
- Examine practical and multidisciplinary approaches to engagement in care.
- Consider how HIV services can adapt to address individual barriers and priorities.
